EVENT_COUNT: 100

This document is the reader's copy of a RITAPod, generated from the same in-memory pod as DropMeInYourFavoriteAI.json. The JSON file is the record of authority. Nothing in this PDF was typed after the pod was assembled.

READ THIS FIRST

This file holds 100 clinical events. If your assistant reports fewer, it truncated the file.

Billing status: FAIL (provisional). Printed total \$64,175.10; corrected total \$63,935.10 (OCR/audit ledger, 209 lines). Until the status is PASS, quote the printed and corrected totals as provisional and do not present either as verified medical specials.

Support audit: unverified means a listed fact was not found in the source event text. 185 verified, 247 unverified, 0 mischaracterized (chronology version cc0ebc12d46bee04; support audit version 0340c74d2fd59374).

1 event(s) carry no date of service (shown as NA). 3 page(s) excluded as another patient's: RH-000121, RH-000516, RH-000857. Identifiers on these pages are withheld by design; the producer holds them.

This is the drop-in copy: routine daily-note text is capped at 600 characters; adjudicating documents (IME, operative, imaging, MMI, discharge) keep full scrubbed text. Remaining full text is in RITAPod_full.json.

Imaging listed here is performed studies only; studies merely referenced or ordered are not counted.

Rules for any assistant reading this document: quote the pre-answered questions; cite the Bates page for every fact; if a fact is not in this document, say "Not found in the extracted chronology" rather than searching for a substitute; never cite the records index, cover, certification, or fax-cover pages as evidence of care.

Pre-answered questions (20)

Answered by RITA from the organized record. Quote these; do not recompute.

Q1. Was the patient ever admitted to the hospital?

Answered

- 1 admission — 04/09/2026–04/10/2026, Millbrook General Hospital [RH-000128 · event 04/09/2026_7de701d6 · combined_chronology.events]
- 1 discharge — 01/20/2026, Millbrook General Hospital [RH-000120 · event 01/20/2026_0a0421cd · combined_chronology.events]

Q2. List every imaging study in the record

Answered

- MRI shoulder — 02/12/2026 (completed) [RH-000427 · event 02/12/2026_d3be79aa · canonical_clinical_index.imaging]
- MRI knee — 02/12/2026 (completed) [RH-000427 · event 02/12/2026_d3be79aa · canonical_clinical_index.imaging]
- XRAY shoulder — 01/20/2026 (completed) [RH-000102 · event 01/20/2026_8e7ec73f · canonical_clinical_index.imaging]
- XRAY knee — 01/20/2026 (completed) [RH-000102 · event 01/20/2026_8e7ec73f · canonical_clinical_index.imaging]
- CT head — 01/20/2026 (completed) [RH-000102 · event 01/20/2026_8e7ec73f · canonical_clinical_index.imaging]
- CT cervical spine (Referenced in the record, report not produced) [referenced_but_absent]
- cervical spine MRI — 02/25/2026 (Referenced in the record, report not produced) [referenced_but_absent]
- EMG — 02/25/2026 (Referenced in the record, report not produced) [referenced_but_absent]

Q3. How many injections or procedures were performed, and when?

Answered

- Left knee arthroscopy with partial medial meniscectomy — 08/14/2019 [RH-000431 · event 08/14/2019_dde12528 · canonical_clinical_index.procedures]
- Right shoulder arthroscopic rotator cuff repair with subacromial decompression — 04/09/2026 [RH-000122 · event 04/09/2026_a72c2683 · canonical_clinical_index.procedures]
- PAST SURGICAL HISTORY (verified): Left knee arthroscopy 2019 — 04/09/2026 [RH-000122 · event 04/09/2026_a72c2683 · canonical_clinical_index.procedures]
- hysterectomy 2016. No prior shoulder surgery — 04/09/2026 [RH-000122 · event 04/09/2026_a72c2683 · canonical_clinical_index.procedures]
- Right shoulder arthroscopy — 04/09/2026 [RH-000126 · event 04/09/2026_4459cc2f · canonical_clinical_index.procedures]
- arthroscopic rotator cuff repair (double-row — 04/09/2026 [RH-000126 · event 04/09/2026_4459cc2f · canonical_clinical_index.procedures]
- subacromial decompression with acromioplasty — 04/09/2026 [RH-000126 · event 04/09/2026_4459cc2f · canonical_clinical_index.procedures]
- MD ANESTHESIA: General endotracheal with right interscalene block (Yusuf R. Haddad — 04/09/2026 [RH-000126 · event 04/09/2026_4459cc2f · canonical_clinical_index.procedures]
- instruments were introduced into the shoulder joint through the arthroscopic portals — 04/09/2026 [RH-000126 · event 04/09/2026_4459cc2f · canonical_clinical_index.procedures]
- or numbness that does not improve as the nerve block wears off — 04/09/2026 [RH-000126 · event 04/09/2026_4459cc2f · canonical_clinical_index.procedures]
- Sleeping positions after shoulder surgery — 04/09/2026 [RH-000126 · event 04/09/2026_4459cc2f · canonical_clinical_index.procedures]
- or numbness that does not improve as the nerve block wears off — 04/09/2026 [RH-000126 · event 04/09/2026_4459cc2f · canonical_clinical_index.procedures]
- Right shoulder arthroscopic rotator cuff repair — 04/10/2026 [RH-000184 · event 04/10/2026_d8df7910 · canonical_clinical_index.procedures]
- subacromial decompression — 04/10/2026 [RH-000184 · event 04/10/2026_d8df7910 · canonical_clinical_index.procedures]
- Interscalene block provided dense analgesia through the evening — 04/10/2026 [RH-000184 · event 04/10/2026_d8df7910 · canonical_clinical_index.procedures]

Q4. Are there gaps in treatment?

Answered

- 47-day gap — 03/11/2026–04/27/2026; documented reason: Assessment / Plan: Pre-op goals met; hold PT pending surgery 04/09/2026 [event 03/11/2026_ad4dc88f · care_gap_detector]
- 28-day gap — 06/10/2026–07/08/2026; documented reason: Patient returns after a 4-week absence (family travel 06/11–07/06); reports stiffness and pain regression to 5/10; Patient reports she will be traveling and wil [event 06/10/2026_80c6367f · care_gap_detector]

Q5. Is there any page in this record that does not belong to this patient?

Answered

- 1 excluded page (page 121); non_case_placeholder [RH-000121 · canonical_facts.wrong_patient_pages]
- 1 excluded page (page 516); non_case_placeholder [RH-000516 · canonical_facts.wrong_patient_pages]
- 1 excluded page (page 857); non_case_placeholder [RH-000857 · canonical_facts.wrong_patient_pages]

Q6. What is the total billed for injury-related care?

Answered, billing failed QA

- total billed \$64,175.10 [RH-000859–RH-000909 · canonical_billing.billing_summary.total_billed_display]
- printed statement total 64175.1 [RH-000859–RH-000909 · canonical_billing.total_billed_printed]
- corrected billed total 63935.1 [RH-000859–RH-000909 · canonical_billing.total_billed_corrected]
- qa_gate_status fail quality_label provisional — Provisional billing ledger (Billing Analysis QA FAIL — not deposition-grade) [RH-000859–RH-000909 · canonical_billing.qa_gate_status]

Q7. Are there any duplicate charges?

Answered, billing failed QA

- 05/20/2026, 97110, \$240.00 total [RH-000859–RH-000909 · canonical_billing.findings]
- corrected total is printed minus duplicates [RH-000859–RH-000909 · canonical_billing]

Q8. Does the record show any pre-existing condition?

Answered

- pre-injury encounter — 08/14/2019, Millbrook Surgical Center [RH-000431 · event 08/14/2019_dde12528 · combined_chronology.events.pre_injury]
- pre-injury encounter — 08/28/2019, Riverbend Physical Therapy [RH-000432 · event 08/28/2019_9b08684e · combined_chronology.events.pre_injury]
- pre-injury encounter — 09/01/2019, Riverbend Physical Therapy [RH-000433 · event 09/01/2019_d8637885 · combined_chronology.events.pre_injury]
- pre-injury encounter — 09/04/2019, Riverbend Physical Therapy [RH-000434 · event 09/04/2019_30956639 · combined_chronology.events.pre_injury]
- pre-injury encounter — 09/08/2019, Riverbend Physical Therapy [RH-000435 · event 09/08/2019_56fb4c40 · combined_chronology.events.pre_injury]
- pre-injury encounter — 09/11/2019, Riverbend Physical Therapy [RH-000436 · event 09/11/2019_472aac6a · combined_chronology.events.pre_injury]
- pre-injury encounter — 09/15/2019, Riverbend Physical Therapy [RH-000437 · event 09/15/2019_c79d5b0e · combined_chronology.events.pre_injury]
- pre-injury encounter — 09/18/2019, Riverbend Physical Therapy [RH-000438 · event 09/18/2019_1346fd36 · combined_chronology.events.pre_injury]
- pre-injury encounter — 09/22/2019, Riverbend Physical Therapy [RH-000439 · event 09/22/2019_70c10022 · combined_chronology.events.pre_injury]
- pre-injury encounter — 09/25/2019, Riverbend Physical Therapy [RH-000440 · event 09/25/2019_23d36f5e · combined_chronology.events.pre_injury]
- pre-injury encounter — 09/29/2019, Riverbend Physical Therapy [RH-000441 · event 09/29/2019_ba637a0c · combined_chronology.events.pre_injury]
- pre-injury encounter — 10/02/2019, Riverbend Physical Therapy [RH-000442 · event 10/02/2019_0db03257 · combined_chronology.events.pre_injury]
- pre-injury encounter — 10/06/2019, Riverbend Physical Therapy [RH-000443 · event 10/06/2019_1428a388 · combined_chronology.events.pre_injury]
- pre-injury encounter — 03/15/2021, Lakeview Primary Care [RH-000004 · event 03/15/2021_0a60b097 · combined_chronology.events.pre_injury]
- pre-injury encounter — 05/10/2022, Lakeview Primary Care [RH-000005 · event 05/10/2022_aff4444a · combined_chronology.events.pre_injury]
- pre-injury encounter — 05/10/2022, Lakeview Primary Care [RH-000006 · event 05/10/2022_d335e8cf · combined_chronology.events.pre_injury]
- pre-injury encounter — 05/16/2023, Lakeview Primary Care [RH-000008 · event 05/16/2023_cd75cfe1 · combined_chronology.events.pre_injury]
- pre-injury encounter — 05/16/2023, Lakeview Primary Care [RH-000009 · event 05/16/2023_d496737c · combined_chronology.events.pre_injury]
- pre-injury encounter — 05/21/2024, Lakeview Primary Care [RH-000011 · event 05/21/2024_f037642e · combined_chronology.events.pre_injury]
- pre-injury encounter — 05/21/2024, Lakeview Primary Care [RH-000012 · event 05/21/2024_f26a70d5 · combined_chronology.events.pre_injury]
- pre-injury encounter — 06/03/2025, Lakeview Primary Care [RH-000014 · event 06/03/2025_d4c711bf · combined_chronology.events.pre_injury]
- pre-injury encounter — 06/03/2025, Lakeview Primary Care [RH-000015 · event 06/03/2025_053479f0 · combined_chronology.events.pre_injury]
- pre-injury encounter — [DOB], Lakeview Primary Care [RH-000940 · event 01/21/2026_33637100 · combined_chronology.events.pre_injury]

Q9. What date did the fax arrive, and is that a date of service?

Answered

- fax banner date Sep. 03 2026, pages 733–828 (not a date of service) [\[page.metadata.fax_date\]](#)
- fax_date is distinct from date of service [\[page.metadata.fax_date\]](#)

Q10. How many physical therapy visits are in the record?

Answered

- 12 physical therapy visits — 2019 episode (08/28/2019–10/06/2019) [combined_chronology.events]
- physical therapy visit — 08/28/2019 (Visit 1) [event 08/28/2019_9b08684e · combined_chronology.events]
- physical therapy visit — 09/01/2019 [event 09/01/2019_d8637885 · combined_chronology.events]
- physical therapy visit — 09/04/2019 (Visit 3) [event 09/04/2019_30956639 · combined_chronology.events]
- physical therapy visit — 09/08/2019 (Visit 4) [event 09/08/2019_56fb4c40 · combined_chronology.events]
- physical therapy visit — 09/11/2019 (Visit 5) [event 09/11/2019_472aac6a · combined_chronology.events]
- physical therapy visit — 09/15/2019 (Visit 6) [event 09/15/2019_c79d5b0e · combined_chronology.events]
- physical therapy visit — 09/18/2019 (Visit 7) [event 09/18/2019_1346fd36 · combined_chronology.events]
- physical therapy visit — 09/22/2019 (Visit 8) [event 09/22/2019_70c10022 · combined_chronology.events]
- physical therapy visit — 09/25/2019 (Visit 9) [event 09/25/2019_23d36f5e · combined_chronology.events]
- physical therapy visit — 09/29/2019 (Visit 10) [event 09/29/2019_ba637a0c · combined_chronology.events]
- physical therapy visit — 10/02/2019 (Visit 11) [event 10/02/2019_0db03257 · combined_chronology.events]
- physical therapy visit — 10/06/2019 (Visit 12) [event 10/06/2019_1428a388 · combined_chronology.events]
- 36 physical therapy visits — 2026 injury (02/02/2026–08/07/2026) [combined_chronology.events]
- physical therapy visit — 02/02/2026 (Visit 1) [event 02/02/2026_a716eb51 · combined_chronology.events]
- physical therapy visit — 02/04/2026 (Visit 2) [event 02/04/2026_ebbfb5cb · combined_chronology.events]
- physical therapy visit — 02/09/2026 (Visit 3) [event 02/09/2026_b3773fb4 · combined_chronology.events]
- physical therapy visit — 02/11/2026 (Visit 4) [event 02/11/2026_ea097aae · combined_chronology.events]
- physical therapy visit — 02/16/2026 (Visit 5) [event 02/16/2026_618b5047 · combined_chronology.events]
- physical therapy visit — 02/18/2026 (Visit 6) [event 02/18/2026_ee54368f · combined_chronology.events]
- physical therapy visit — 02/23/2026 (Visit 7) [event 02/23/2026_3c326d53 · combined_chronology.events]
- physical therapy visit — 02/25/2026 (Visit 8) [event 02/25/2026_eac00667 · combined_chronology.events]
- physical therapy visit — 03/02/2026 (Visit 9) [event 03/02/2026_f897e530 · combined_chronology.events]
- physical therapy visit — 03/04/2026 (Visit 10) [event 03/04/2026_a8dd90f8 · combined_chronology.events]
- physical therapy visit — 03/09/2026 (Visit 11) [event 03/09/2026_c613eb24 · combined_chronology.events]
- physical therapy visit — 03/11/2026 (Visit 12) [event 03/11/2026_ad4dc88f · combined_chronology.events]
- physical therapy visit — 04/27/2026 (Visit 13) [event 04/27/2026_c11c2207 · combined_chronology.events]
- physical therapy visit — 04/29/2026 (Visit 14) [event 04/29/2026_acb92700 · combined_chronology.events]
- physical therapy visit — 05/04/2026 (Visit 15) [event 05/04/2026_928c7fc9 · combined_chronology.events]
- physical therapy visit — 05/06/2026 (Visit 16) [event 05/06/2026_40d74275 · combined_chronology.events]
- physical therapy visit — 05/11/2026 (Visit 17) [event 05/11/2026_c3a5837e · combined_chronology.events]
- physical therapy visit — 05/13/2026 (Visit 18) [event 05/13/2026_638bbc9b · combined_chronology.events]
- physical therapy visit — 05/18/2026 (Visit 19) [event 05/18/2026_d746fe4c · combined_chronology.events]
- physical therapy visit — 05/20/2026 (Visit 20) [event 05/20/2026_7c2f3f54 · combined_chronology.events]
- physical therapy visit — 05/25/2026 (Visit 21) [event 05/25/2026_dd67b66f · combined_chronology.events]
- physical therapy visit — 05/27/2026 (Visit 22) [event 05/27/2026_3b91ed8d · combined_chronology.events]

- physical therapy visit — 08/07/2026 (Visit 36) [event 08/07/2026_f873f859 · combined_chronology.events]

Q11. List every completed imaging study

Answered

- MRI shoulder — 02/12/2026 (completed) [RH-000427 · event 02/12/2026_d3be79aa · canonical_clinical_index.imaging]
- MRI knee — 02/12/2026 (completed) [RH-000427 · event 02/12/2026_d3be79aa · canonical_clinical_index.imaging]
- XRAY shoulder — 01/20/2026 (completed) [RH-000102 · event 01/20/2026_8e7ec73f · canonical_clinical_index.imaging]
- XRAY knee — 01/20/2026 (completed) [RH-000102 · event 01/20/2026_8e7ec73f · canonical_clinical_index.imaging]
- CT head — 01/20/2026 (completed) [RH-000102 · event 01/20/2026_8e7ec73f · canonical_clinical_index.imaging]
- CT cervical spine (Referenced in the record, report not produced) [referenced_but_absent]
- cervical spine MRI — 02/25/2026 (Referenced in the record, report not produced) [referenced_but_absent]
- EMG — 02/25/2026 (Referenced in the record, report not produced) [referenced_but_absent]

Q12. Was the patient admitted to the hospital?

Answered

- 1 admission — 04/09/2026–04/10/2026, Millbrook General Hospital [RH-000128 · event 04/09/2026_7de701d6 · combined_chronology.events]
- 1 discharge — 01/20/2026, Millbrook General Hospital [RH-000120 · event 01/20/2026_0a0421cd · combined_chronology.events]

Q13. Is there a page in this record that does not belong to this patient?

Answered

- 1 excluded page (page 121); non_case_placeholder [RH-000121 · canonical_facts.wrong_patient_pages]
- 1 excluded page (page 516); non_case_placeholder [RH-000516 · canonical_facts.wrong_patient_pages]
- 1 excluded page (page 857); non_case_placeholder [RH-000857 · canonical_facts.wrong_patient_pages]

Q14. Are there gaps in treatment after the date of injury?

Answered

- 47-day gap — 03/11/2026–04/27/2026; documented reason: Assessment / Plan: Pre-op goals met; hold PT pending surgery 04/09/2026 [event 03/11/2026_ad4dc88f · care_gap_detector]
- 28-day gap — 06/10/2026–07/08/2026; documented reason: Patient returns after a 4-week absence (family travel 06/11–07/06); reports stiffness and pain regression to 5/10; Patient reports she will be traveling and wil [event 06/10/2026_80c6367f · care_gap_detector]

Q15. Does the record show pre-existing conditions?

Answered

- pre-injury encounter — 08/14/2019, Millbrook Surgical Center [RH-000431 · event 08/14/2019_dde12528 · combined_chronology.events.pre_injury]
- pre-injury encounter — 08/28/2019, Riverbend Physical Therapy [RH-000432 · event 08/28/2019_9b08684e · combined_chronology.events.pre_injury]

Q16. What is the total billed?

Answered, billing failed QA

- total billed \$64,175.10 [RH-000859–RH-000909 · canonical_billing.billing_summary.total_billed_display]
- printed statement total 64175.1 [RH-000859–RH-000909 · canonical_billing.total_billed_printed]
- corrected billed total 63935.1 [RH-000859–RH-000909 · canonical_billing.total_billed_corrected]
- qa_gate_status fail quality_label provisional — Provisional billing ledger (Billing Analysis QA FAIL — not deposition-grade) [RH-000859–RH-000909 · canonical_billing.qa_gate_status]

Q17. Are there duplicate charges on the ledger?

Answered, billing failed QA

- 05/20/2026, 97110, \$240.00 total [RH-000859–RH-000909 · canonical_billing.findings]
- corrected total is printed minus duplicates [RH-000859–RH-000909 · canonical_billing]

Q18. What date did the fax arrive?

Answered

- fax banner date Sep. 03 2026, pages 733–828 (not a date of service) [page.metadata.fax_date]
- fax_date is distinct from date of service [page.metadata.fax_date]

Q19. List every imaging study in the record.

Answered

- MRI shoulder — 02/12/2026 (completed) [RH-000427 · event 02/12/2026_d3be79aa · canonical_clinical_index.imaging]
- MRI knee — 02/12/2026 (completed) [RH-000427 · event 02/12/2026_d3be79aa · canonical_clinical_index.imaging]

MILLBROOK SURGICAL CENTER 3 Hospital Way, Millbrook, [MRN:p1] Patient: [Name:p1]. DOB: [DOB:p1] MRN: [MRN:p1] Date of Service: 08/14/2019 OPERATIVE REPORT PREOPERATIVE DIAGNOSIS: Left knee medial meniscus tear, posterior horn. POSTOPERATIVE DIAGNOSIS: Left knee medial meniscus tear, posterior horn; grade II chondromalacia medial femoral condyle. PROCEDURE: Left knee arthroscopy with partial medial meniscectomy and chondroplasty. SURGEON: Wendell P. Osei, MD ANESTHESIA: General LMA EBL; minimal COMPLICATIONS: none. INDICATIONS: 40-year-old woman with six months of LEFT knee medial joint line pain and mechanical catching after a hiking misstep in 02/2019; MRI 06/2019 showed a posterior horn medial meniscus tear. Failed conservative care. DESCRIPTION OF PROCEDURE The patient was brought to the operating room, identified, and the LEFT knee was marked and confirmed during time-out. After induction of general anesthesia a tourniquet was placed on the left thigh. Standard anterolateral and anteromedial portals were established. Diagnostic arthroscopy: patellofemoral joint with grade II chondromalacia of the medial femoral condyle; ACL and PCL intact; lateral compartment normal; medial compartment with a complex tear of the posterior horn of the medial meniscus. Using a basket punch and shaver, a partial medial meniscectomy was performed back to a stable rim. Chondroplasty of the loose flap on the medial femoral condyle. The joint was irrigated, portals closed with nylon, sterile dressing and a knee immobilizer applied. The patient tolerated the procedure well and was taken to recovery in stable condition. DISPOSITION: Discharged home same day. Weight bearing as tolerated. PT referral. Electronically signed: Wendell P. Osei, MD Millbrook Surgical Center Confidential medical record RH-000431

LAKEVIEW PRIMARY CARE 88 Lakeview Drive, Suite 2, Millbrook, [MRN:p1] · [Phone] Patient: [Name:p1]. DOB: [DOB:p1] MRN: [MRN:p1]
Date of Service: 05/10/2022 ANNUAL HEALTH MAINTENANCE EXAMINATION Diagnoses: Encounter for general adult medical examination without abnormal findings ICD-10: Z 00.00 Chief concern: Annual examination. Feels well. Exercises 4x/week. FAMILY HISTORY Father died of an MI at age 67 with COPD and was a heavy smoker. Her mother is 88, living and well, status post lung cancer resection. Two brothers, living and well. One sister died at age 20 months of pneumonia. SOCIAL HISTORY The patient is married. Wife is living and well. She jogs or does Cross Country track 5 times a week, and weight training twice weekly. No smoking or significant alcohol intake. She is a physician in allergy/immunology. PHYSICAL EXAMINATION GENERAL She appears alert, oriented, and in no acute distress with excellent cognitive function. VITAL SIGNS: Her height is 6 feet 2 inches, weight is 181.2, blood pressure is 126/80 in the right arm, 122/78 in the left arm, pulse rate is 68 and regular, and respirations are 16. SKIN: Warm and dry. There is no pallor, cyanosis or icterus. HEENT: Tympanic membranes benign. The pharynx is benign. Nasal mucosa is intact. Pupils are round, regular, and equal, reacting equally to light and accommodation. EOM intact. Fundi reveal flat discs with clear margins. Normal vasculature. No hemorrhages, exudates or microaneurysms. No thyroid enlargement. There is no lymphadenopathy. LUNGS: Clear to percussion and auscultation. Normal sinus rhythm. No premature beat, murmur, S3 or S4. Heart sounds are of good quality and intensity. The carotids, femorals, dorsalis pedis, and posterior tibial pulsations are brisk, equal, and active bilaterally. ABDOMEN: Benign without guarding, rigidity, tenderness, mass or organomegaly. NEUROLOGIC: Grossly intact. EXTREMITIES: Normal. GU: Genitalia normal. There are no inguinal hernias. There are mild hemorrhoids in the anal canal. The prostate is small, if any normal to mildly enlarged with discrete margins, symmetrical without significant palpable abnormality. There is no rectal mass. The stool is Hemoccult negative. MUSCULOSKELETAL Full active range of motion of both shoulders and both knees without pain. No joint effusion. Gait normal. Denies neck, shoulder, back or knee pain today. ASSESSMENT / PLAN Healthy 47-year-old woman. Routine labs ordered (see attached). Return in one year. Electronically signed: Devorah S. Feinberg, MD Lakeview Primary Care · Confidential medical record RH-000005

DOB: [DOB:p1] MRN: [MRN:p1] Date of Service: 02/12/2026 MRI RIGHT SHOULDER WITHOUT CONTRAST Diagnoses: Full-thickness tear of the supraspinatus tendon, right shoulder CLINICAL: 47-year-old woman; fall on outstretched hand 01/20/2026; weakness and pain. TECHNIQUE: Multiplanar, multisequence MRI of the right shoulder on a 1.5T magnet. FINDINGS Rotator cuff: There is a full-thickness, full-width tear of the supraspinatus tendon at its insertion on the greater tuberosity, with the torn tendon edge retracted approximately 1.2 cm medially to the level of the humeral head apex. Fluid extends from the glenohumeral joint through the defect into the subacromial-subdeltoid bursa. The supraspinatus muscle belly shows normal bulk and signal without fatty infiltration (Goutallier 0–1). Mild tendinosis of the infraspinatus without tear. The subscapularis and teres minor are intact. Long head of the biceps tendon is normally located within the groove without tear; the biceps anchor is intact. Labrum: Intact without tear. Glenohumeral ligaments intact. No Hill-Sachs or Bankart lesion. Bones: Mild reactive marrow edema at the greater tuberosity footprint. No fracture. Type II (curved) acromion with a small anterior spur. Mild acromioclavicular degenerative change with capsular hypertrophy. Joint: Small glenohumeral effusion. No loose bodies. Articular cartilage preserved. IMPRESSION 1. Full-thickness tear of the supraspinatus tendon with approximately 1.2 cm of retraction and fluid in the subacromial-subdeltoid bursa. No fatty atrophy of the supraspinatus muscle (Goutallier 0–1), favoring an acute or subacute tear. 2. Mild infraspinatus tendinosis without tear. Intact subscapularis. 3. Small joint effusion. Mild acromioclavicular degenerative change with a type II acromion. Electronically signed: Priya N. Sundaram, MD Clearwater Imaging · Confidential medical record RH-000427 CLEARWATER IMAGING 2200 Clearwater Boulevard, Millbrook, [MRN:p1] · [Phone] Patient: [Name:p1]. DOB: [DOB:p1] MRN: [MRN:p1] Date of Service: 02/12/2026 MRI RIGHT KNEE WITHOUT CONTRAST Diagnoses: Bone contusion, patella, right knee; No meniscal or ligamentous tear CLINICAL: Fall onto the knee 01/20/2026; persistent effusion. FINDINGS: Bone marrow edema in the inferior pole of the patella consistent with contusion. Small joint effusion. Menisci intact. ACL, PCL, collateral ligaments intact. Articular cartilage preserved. Extensor mechanism intact. IMPRESSION: Patellar bone contusion with small effusion. No internal derangement. Electronically signed: Priya N. DOB: [DOB:p1] MRN: [MRN:p1] Date of Service: 02/25/2026 FOLLOW-UP — MRI REVIEW Diagnoses: Full-thickness supraspinatus tear, right shoulder, traumatic; Right knee patellar contusion ICD-10: S 46.011A, S 80.01 XA Interval: Completed 6 PT visits; night pain persists; cannot work overhead. MRI right shoulder 02/12/2026 reviewed with the patient: full-thickness supraspinatus tear, 1.2 cm retraction, no atrophy. MRI right knee: contusion only. FINDINGS On examination, she has 4 plus over 5 strength in the right biceps and triceps muscle groups, 4 out of 5 right deltoid, 5 out of 5 otherwise in both muscle groups and all muscle groups of upper extremities. Light touch sensation is minimally decreased in the right C6 distribution; otherwise, intact. Biceps and brachioradialis reflexes are 1 plus. Hoffmann sign normal bilaterally. Motor strength is 5 out of 5 in all Pinecrest Orthopedics & Sports Medicine · Confidential medical record RH-000417 PINECREST ORTHOPEDICS & SPORTS MEDICINE 410 Pinecrest Road, Suite 120, Millbrook, [MRN:p1] · [Phone] Pinecrest Orthopedics & Sports Medicine · Patient: [Name:p1]. · DOB: [DOB:p1] · Page 3 of 3 Patient: [Name:p1]. DOB: [DOB:p1] MRN: [MRN:p1] Date of Service: 02/25/2026 (continued) muscle groups in lower extremities. Hawkins and Neer impingement signs are positive at the right shoulder. An EMG study performed on 02/25/2026 demonstrates no evidence of radiculopathy or plexopathy or nerve entrapment to the right upper extremity. Cervical spine MRI dated 02/25/2026 is reviewed. It is relatively limited study due to artifact. She does demonstrate evidence of minimal-to-moderate stenosis at the C5-C6 level but without evidence of cord impingement or cord signal change. There appears to be right paracentral disc herniation at the C5-C6 level, although axial T2-weighted images are quite limited. ASSESSMENT / PLAN Traumatic full-thickness rotator cuff tear in a 47-year-old without fatty infiltration — a good surgical candidate; delay risks retraction and atrophy. Recommend arthroscopic rotator cuff repair with subacromial decompression. Patient elects to complete a further 4 weeks of physical therapy first (work Pinecrest Orthopedics & Sports Medicine · Confidential medical record RH-000418 PINECREST ORTHOPEDICS & SPORTS MEDICINE 410 Pinecrest Road, Suite 120, Millbrook, [MRN:p1] · [Phone] Pinecrest Orthopedics & Sports Medicine · Patient: [Name:p1]. · DOB: [DOB:p1] · Page 2 of 3 Patient: [Name:p1]. DOB: [DOB:p1] MRN: [MRN:p1] Date of Service: 04/09/2026 OPERATIVE REPORT PREOPERATIVE DIAGNOSIS: Full-thickness tear of the supraspinatus tendon, right shoulder; shoulder impingement syndrome. POSTOPERATIVE DIAGNOSIS: Same; full-thickness supraspinatus tear 1.2 cm x 1.5 cm, retracted to the mid-humeral head; type II acromion with anterior spur. PROCEDURE: Right shoulder arthroscopy; arthroscopic rotator cuff repair (double-row, two 5.5 mm anchors medial, two 4.75 mm knotless anchors lateral); subacromial decompression with acromioplasty; bursectomy. SURGEON: Hollis A. Brankovic, MD ANESTHESIA: General endotracheal with right interscalene block (Yusuf R. Haddad, MD) EBL: 30 m L COMPLICATIONS: None IMPLANTS: four suture anchors (lot numbers on implant log). INDICATIONS: 47-year-old woman with a traumatic full-thickness supraspinatus tear after a fall on the outstretched hand on 01/20/2026, confirmed by MRI 02/12/2026, with persistent pain and weakness despite 12 sessions of physical therapy. ACROMION 1. There was a medium-sized (5 - 10 mm) anterior acromial spur. 2. The subacromial bursa was inflamed. 3. The subacromial bursa was thickened. 4. There was thickening of the coracoacromial ligament. LIGAMENTS / CAPSULE Joint capsule within normal limits. LABRUM The labrum is within normal limits. ROTATOR CUFF Full thickness tear of the supraspinatus tendon, 5 mm anterior to posterior, by 10 mm medial to lateral. Muscles and Tendons: The biceps tendon is within normal limits. JOINT Normal appearance of the glenoid and humeral surfaces. DESCRIPTION OF PROCEDURE PATIENT POSITIONING Following induction of anesthesia, the patient was placed in the beach-chair position on the standard operating table. All body parts were well padded and protected to make sure there were no pressure points. Subsequently, the surgical area was prepped and draped in the appropriate sterile fashion with Betadine. INSTRUMENTS AND METHODS 1. The arthroscope and instruments were introduced into the shoulder joint through the arthroscopic portals. 2. The subacromial space and bursa, biceps tendon, coracoacromial and glenohumeral ligaments, biceps tendon, rotator cuff, supraspinatus, subscapularis, infraspinatus, teres minor, capsulo-labral complex, capsule, glenoid labrum, humeral head, and glenoid, including the inner and outer surfaces of the rotator cuff, were visualized and probed. 3. The subacromial bursa, subacromial soft tissues and frayed rotator cuff tissue were resected and debrided using a motorized resector and 4.5 Millbrook General Hospital · Confidential medical record RH-000127 Millbrook General Hospital Patient: [Name:p1]. DOB: [DOB:p1] MRN: [MRN:p1] Date of Service: 04/10/2026 DISCHARGE SUMMARY Admitted: 04/09/2026 Discharged: 04/10/2026 10:30 Length of stay: 1 day Attending: Hollis A. Brankovic, MD Diagnoses: Full-thickness supraspinatus tear, right shoulder, status post arthroscopic repair and subacromial decompression 04/09/2026 Procedures: Right shoulder arthroscopic rotator cuff repair, double-row; subacromial decompression; bursectomy (04/09/2026). Hospital course: Uncomplicated. Interscalene block provided dense analgesia through the evening; as it resolved overnight pain rose to 7/10 and was controlled with scheduled acetaminophen, ketorolac and oral oxycodone. Ambulating independently by POD1 morning. Portals dry. POD1 labs unremarkable (WBC 10.9, expected post-operative). Tolerating diet, voiding. Discharge medications: acetaminophen 1000 mg q6h; oxycodone 5 mg q6h PRN #20; docusate; ondansetron PRN. Ibuprofen and cyclobenzaprine discontinued. Instructions: Sling with abduction pillow at all times except pendulums and hygiene for 6 weeks. No active lifting of the right arm. Cryotherapy. Pendulum exercises 3x daily. Return precautions reviewed. Physical therapy to begin 04/27/2026 per protocol. Follow up in clinic 04/22/2026 for suture removal. Work status: off work until cleared at the 2-week visit; then sedentary duty only, no use of the right arm. Electronically signed: Hollis A. PRUETT ORTHOPEDIC EVALUATIONS, PLLC 900 Commerce Park, Suite 400, Millbrook, [MRN:p1] : Patient: [Name:p1] L. DOB: [DOB:p1] MRN: [MRN:p1] Date of Service: 07/15/2026 . . INDEPENDENT MEDICAL EXAMINATION — ORTHOPEDIC : Examinee: [Name:p1]. [Name:p1] L. DOB: [DOB:p1] Date of examination: 07/15/2026 Examiner: Gerald T. Pruett. MD (board-certified orthopedic surgery) — Requested by: counsel for the defendant (Marchetti's Market) Claim: premises liability, fall of 01/20/2026 ' Diagnoses: Right shoulder rotator cuff tear, status Post repair (IME assessment) RECORDS REVIEWED Lakeview Primary Care 2021-2026 (including 03/15/2021 shoulder visit); Millbrook General Hospital ED 01/20/2026 and admission 04/09-04/10/2026; Pinecrest Orthopedics 01/28/2026-07/01/2026] Clearwater Imaging MRI 02/12/2026; Riverbend Physical Therapy 2019 and 2026; Millbrook Surgical C HISTORY (AS RELATED BY THE EXAMINEE) € and knee and struck her head. She denies any right shoulder symptoms in the year before " _ feports the 2021 episode as "a sore shoulder after the gym that went away in two weeks." PHYSICAL EXAMINATION A pleasant. age appropriate woman. moderately overweight, in no apparent distress. Normal and station, normal posture, normal strength, tone, sensation and deep tendon reflexes with the ption of 4+/5 strength in the supraspinatus musculature on the right. She has decreased motion in th right shoulder as follows, She has 160 degrees of flexion, 155 degrees of abduction, 35 degrees of >xtension, 25 degrees of adduction. 45 degrees of internal rotation and 90 degrees of external rotation. hasa Positive impingement sign' on the right. Re DIAGNOSTIC STUDIES / ; < The MRI of 02/12/2026 demonstrates a full-thickness supraspinatus tear with 1.2 cm retraction and a type i acromion with anterior spurring; the ED radiograph of the same shoulder shows subacromial spurring. - DISCUSSION AND OPINIONS : ' : it is this examiner's opinion, to @ reasonable degree of medical probability, that the examinee Y pre-existing degenerative changes of the right shoulder (type II acromion, subacromial spurring. and a documented 2021 episode of right shoulder pain) and that the Supraspinatus tear was more |i Not a degenerative tear that became symptomatic with the fall of 01/20/2026, rather than an traumatic tear. The fall aggravated a pre-existing condition. Apportionment: 50% pre-existing degeneration, 50% the fall. The surgery was reasonable. The examinee has reached maximurr medical improvement as of this examination. No permanent restrictions are warranted; the 20-pound restriction recommended by the treating surgeon is not supported by the examination today. (Note: the treating orthopedist's records and the Fadiologist's MRi report characterize the tear 4s - acute/subacute, citing the absence of fatty atrophy and the traumatic mechanism. The exam disagrees for the reasons above.) Electronically signed: Gerald T. Pruett, MD 'ute Pruett Orthopedic Evaluations - Confidential medical record 7 RH-000831
